

WOW! Eliminates Dead Zones and Slow Zones with Whole-Home WiFi Mesh Internet Solution in Pinellas

Pinellas customers first to receive WOW!'s innovative new WiFi experience for fast, reliable WiFi across entire home.

Pinellas, Fla. – July 10, 2018 – [WOW! Internet, Cable & Phone](#) (NYSE: WOW), a leading broadband and communications service provider, today announced the availability of its new WOW! Whole-Home WiFi solution in Pinellas. Whole-Home WiFi is WOW!'s new mesh network solution that provides WOW! customers a custom, scalable network to stream, work and browse from every corner of their home. WOW! is rolling out the solution first to Pinellas, Florida and Columbus, Ohio before expanding across the rest of the WOW! footprint later this summer.

WOW!'s Whole-Home WiFi solution, which uses the [eero](#) home WiFi system, ensures fast, secure, and reliable service across the entire home. Instead of using a single router, Whole Home WiFi is customized to every home using multiple eero access points, learning your space, devices and network usage to deliver fast Internet anywhere you need. In addition, WOW!'s new mesh network solution provides increased security over traditional routers.

“We’re bringing connectivity to Pinellas unlike ever before with our fastest, most reliable and most secure WiFi available. Whether you’re uploading photos from a day at the beach or livestreaming from the living room on a cloudy day, our Pinellas customers will enjoy hassle-free downloading, streaming and gaming in every corner of the home,” said Teresa Elder, CEO of WOW!. “With WOW! Whole-Home WiFi there are no more slow zones, no more dead zones. Starting today, there are only WOW! zones, no matter where you are in your home or backyard.”

WOW!'s Whole-Home WiFi solution is highlighted by its unmatched customer support and comes with a convenient, white-glove set-up from a WOW! technician, ensuring the entire home has seamless connectivity. WOW! technicians will customize the WiFi network to a home’s specific needs, giving customers the best and most secure connection possible no matter where they’re streaming, downloading, surfing or gaming.

With 50 billion connected devices [expected by 2020](#), and up to [50 devices expected](#) to be connected via WiFi in one home, reliable and secure WiFi is critical for customer satisfaction.

“Home WiFi systems should protect customers from the increasing number of security threats to connected devices in the home,” said Nate Hardison, co-founder and head of product, eero inc. “We built eero hardware and software together to ensure that we can control and improve digital security, and know WOW! customers will benefit from this new offering.”

WOW! Whole-Home WiFi is easily bundled with WOW! residential Internet services. With Whole Home WiFi, customers can choose from a handful of fast Internet speed options alongside TV and phone packages that are best suited to each customer’s needs. WOW! offers three residential Internet speeds: Internet 100 – up to 100Mbps, Internet 500 – up to 500Mbps and Internet 1000, WOW!’s offering with speeds up to 1Gbps – the fastest residential speed in WOW!’s bundles.
